

- Established: 1994
- Oracle Consulting
- Custom Software Development
- Government & Private Sector History

Exevision, a leading Utah-based software development firm, has been providing government and private sector clients with quality custom software solutions since 1994. As Oracle's longtime training partner, ExeVision's experience with Oracle and Oracle development in the early days won them the trust and confidence of many of Utah's largest employers.

Founded as PC Software Systems, LC in 1994, ExeVision's objective was to provide the best technical service and the best business practices in IT consulting and development in the Mountain West.

ExeVision's role as the Oracle University training partner and as **Oracle consultants** in Utah for many years has developed the company into the premier Oracle consulting shop in Utah with extensive knowledge in **Oracle database implementation & installation, upgrade, configuration, maintenance, backup & recovery, tuning and administration** and other DBA functions. Our clients range from large government agencies to universities and small businesses, with quality of service that has retained some customers for over 10 years.

ExeVision's custom development business provides services ranging from resource augmentation for a specific project, to end-to-end design, project management and application deployment. With highly experienced developers on a number of platforms and environments including PL/SQL, .NET and Web Services, ExeVision can provide you the value and experience you need for successful development.

ExeVision specializes in the **design, development, and deployment of custom software** using small teams of highly specialized individuals. ExeVision has a history of providing client solutions on-time, in-budget, and within-scope including several mission-critical custom deployments for state governments and large private customers. Two of these solutions include iPD, a modular end-to-end project management solution for city/state road and bridge building and eFIND, an intelligent entitlement program qualification search engine for the Utah State Department of Workforce Services.

ExeVision is a privately-held Utah company.
